

16 Jul 1997

Leo Francendese:

Here's a map of the Terry Creek Project that shows the boundaries of the channel the Corps of Engineers dredged since the project's inception. As you can see when you examine the data against the map, all the highest hits noted on the HRS Scoring Sheets are outside the bounds of the navigation channel. We are examining this further to see if this holds true with all the other studies/samplings taken. We suspect it will.

I'll provide you with other copies of pertinent documents as I go along. Please feel free to call me anytime.
